

## BENEFITS OF ECONO-HEAT® PANEL HEATERS

- ✓ Affordable economic heating  
*"Keeping you warm for less"*
- ✓ Suitable for all rooms
- ✓ Ideal for Bedrooms and Hallways
- ✓ Safer than other heaters for children and pets
- ✓ Completely silent operation
- ✓ Versatile modern design
- ✓ Paintable to match your wall colour
- ✓ Wall mounted - just plug in and turn on
- ✓ Environment friendly

*"We purchased an ECONO-HEAT® panel for our son's bedroom. Using a timer switch enabled us to set exactly when we wanted the heater to come on and turn off again, just like a central heating system. Brilliant." - Cheryl Ross*

### INSTALLATION

ECONO-HEAT® panels are designed to be quickly and easily installed following the instructions given with every panel and using the mounting kit provided. Each panel can be installed in under 20 minutes and simply plugged into an adjacent power point.

### STANDARDS APPROVAL

ECONO-HEAT® panels comply with NZ, Australian, British, USA, European Community and South African electrical safety standards. They are approved for sale in New Zealand. The current Certificate of Approval number is available on request.

### 3 YEAR WARRANTY

ECONO-HEAT® panels have a 3 year warranty in New Zealand as long as the relevant safety and installation instructions are complied with.

*help New Zealand save electricity*

## ABOUT ECONO-HEAT® PANELS

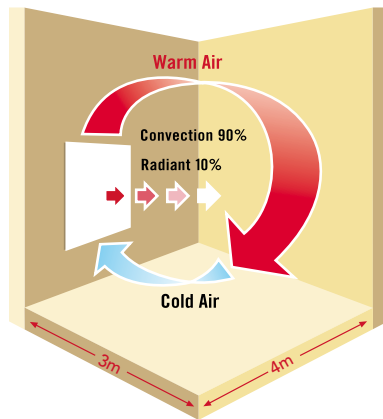

We believe ECONO-HEAT® wall panel heaters are the world's most economical electric panel heater, offering you out-of-the-way wall mounting and efficient room heating at a remarkably low cost.

## HOW ECONO-HEAT® PANELS WORK

ECONO-HEAT® panels provide a constant background heat whilst using very little electricity. This heating concept is similar to some central heating systems, but ECONO-HEAT® panels are much cheaper to purchase, install and operate.

Using convection technology, ECONO-HEAT® wall panel heaters generate an efficient up-draught of heat circulated into the room. Once the panel is up to temperature, about 90% of the total heat generated is distributed by natural convection, the remaining 10% by radiation.

## NATURAL CONVECTION CREATES HIGH EFFICIENCY HEATING

## WHAT ARE THEY MADE FROM?

ECONO-HEAT® panels are constructed from two cement fibre boards with an element wire laminated between them, and come complete with a 400mm cord and plug. The panels are factory painted with supersilk wipe clean water based paint.

The surface temperature does not normally exceed 90°C and there are no exposed elements like some heaters available, making the ECONO-HEAT® panels safer for children and pets.

## VERSATILE MODERN DESIGN

ECONO-HEAT® panels are very versatile - they can be painted with any good quality water-based paint to match, or contrast with your wall colour.

The panels come with an illuminated on/off side switch (pictured) a simple 3-step installation kit and a 400mm power cord and plug.

## ONLY 400 WATTS

Heats a room of approximately 12m<sup>2</sup>

*ECONO-HEAT® - keeping you warm for less*

## ECONO-HEAT® PANEL SPECS

### 400W ELECTRIC PANEL HEATER

- Typically covers an area of 12m<sup>2</sup> \*
- 9 cents per hour\*\*

- 600 x 600 x 10 mm
- Weight approx 7kg
- Illuminated on/off side switch
- 400mm power cord and plug
- Easy 3-step installation kit supplied

**\$199 each**

### 260W ELECTRIC PANEL HEATER

- Typically covers an area of 9m<sup>2</sup> \*
- 5 - 6 cents per hour\*\*

- 450 x 600 x 10 mm
- Weight approx 5kg
- Illuminated on/off side switch
- 400mm power cord and plug
- Easy 3-step installation kit supplied
- Can be mounted landscape

**\$179 each**
